Joseph
Boafo Afful

FRONTEND DEVELOPER & VISUAL DESIGNER

PROFILE

Computer Science student at KNUST with a freelance design practice delivering visual identities and digital assets across Ghana. I work at the intersection of design and development — bringing design thinking to code, and technical precision to visual work. I leverage AI-augmented workflows and prompt engineering to plan, build, and ship faster, treating LLMs as active collaborators rather than passive tools. Open to internships, freelance projects, and entry-level roles that value both craft and execution.

EXPERIENCE

Founder & Lead Designer

Feb 2025 – Present

Astrolab · Freelance · Kumasi, Ghana

- ▶ Designed full campaign identity for an electoral candidate at KNUST — delivering print and digital visuals that communicate authority and credibility.
- ▶ Deliver brand identities, event flyers, social media graphics, and logo concepts for individual and business clients across Ghana.
- ▶ Integrate AI-assisted workflows to accelerate planning, iteration, and client communication from brief to delivery.
- ▶ Produce high-impact visual assets using Adobe Photoshop, applying industry-standard design principles throughout.

EDUCATION

BSc Computer Science

2026 – 2029

Kwame Nkrumah University of Science & Technology (KNUST)

VOLUNTEERING

Event Volunteer

2024

Cursor AI Hackathon — KNUST (First Edition)

Supported operations at KNUST's inaugural AI-focused hackathon, contributing to a smooth experience for participants building with AI developer tools.
